

WP D2 — Do all federal states warm equally?

For each region compute the warming (mean 1995–2024 minus mean 1881–1910), then median, interquartile range and spread across the states. Sorted bar plot, plus a short north–south comparison. Output: one sorted figure + one sentence like “all regions warmed; the spread is small — warming is national, not regional”. Effort: small.

Milestones / Deliverables

1. Checkpoint: analysis runs in your scratch, Fig 5 as draft(s), one sentence with a number.
2. Final (documented in the notebook): Fig 5 done + key figures; plus 2–3 sentences — what I computed, what the figure shows, why it looks that way, and how you can see it in the numbers.
3. Submission-ready: code runs top to bottom on “Restart & Run All”, fig5_*.png in figures/, pushed (or sent to the integrator).

Template: projekt_schritte.md Block 3. Work in a copy of the scratch (scratch_<yourname>.ipynb), start from ../data/clean/temp_annual_regions.csv.
